Art Unit: 1775

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claim 18 is rejected under 35 U.S.C. 102(e) as being anticipated by Petrmichl et al (5,618,619).

Petrmichl et al discloses a carbon coating on an image forming apparatus.

3. Claim 22 is rejected under 35 U.S.C. 102(b) as being anticipated by Minolta (JP 64-090484).

Minolta discloses a carbon coating on a wiper blade.

4. Claim 23 is rejected under 35 U.S.C. 102(b) as being anticipated by Sumitomo (JP 02 197401).

Sumitomo discloses a carbon coating on a tire.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Showa Denko (JP 04 136172) in view of Nakahigashi et al (5,562,952) or TDK (abstract of JP 04 041672) or Yamazaki et al (5,230,930) or Itoh (4,996,079) or Thaler (4,981,717).

Showa Denko discloses the use of carbon coating on pipes, but not polymeric ones. The examiner takes official notice that pipes made of polymer are known in the art.

Nakahigashi et al or TDK or Yamazaki et al or Itoh or Thaler show that carbon coating are known on polymeric substrates to provide protection.

Thus it would have been obvious to one of ordinary skill in the art, to provide polymeric pipes with a protective carbon coating.

7. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over NEC Corp (JP 05196864) in view of Nakahigashi et al (5,562,952) or TDK (abstract of JP 04 041672) or Yamazaki et al (5,230,930) or Itoh (4,996,079) or Thaler (4,981,717).

Art Unit: 1775

NEC Corp discloses the use of carbon coating on a diaphragm, but not explicitly polymeric ones. The examiner takes official notice that diaphragms made of polymer are known in the art.

Nakahigashi et al or TDK or Yamazaki et al or Itoh or Thaler show that carbon coating are known on polymeric substrates to provide protection.

Thus it would have been obvious to one of ordinary skill in the art, to provide polymeric pipes with a protective carbon coating.
